

Thomas Kokkinos

Industrial Designer - Melbourne, Victoria

Industrial design graduate from RMIT university with First Class Honours. Strong interest in sustainable design, material development, creative problem solving and form development. Experience with CAD software, Adobe suite and showcasing product development through prototyping and sketches. Seeking a role in a creative and collaborative environment where I can learn and develop skills as an industrial designer.

Professional

- Strong communication and presentation skills
- Collaborative team player in studio-based environments
- Receptive to feedback and iterative design processes
- Effective time management and deadline management
- User-focused thinking and problem-solving mindset

Technical

- Prototyping/Electronic prototyping
- CAD modeling
- Sketching
- Adobe suite (Illustrator, InDesign, Photoshop, Premiere pro)

Relevant Projects

Soft wearable listening device

Designed a soft wearable garment with embedded bone conductive speakers to create a new sound experience and explore how sound plays a role in cognition and concentration. Conducted a year long research and development process.

Music Synthesiser

Designed, coded, prototyped and manufactured a working synthesiser instrument. Worked in collaboration with a partner to complete full design process from iteration to working prototype.

Furniture Design

Designed and manufactured a wooden bedside table with embedded lighting system. Worked in a workshop environment using a range of tools and equipment.
